

Electronically Scan & Store Taxpayer Documents and Information

Improve efficiency accuracy

Improve efficiency and accuracy while saving time with integrated support for Scan & Store technology. With support for Scan & Store built into your professional tax software solution, you can now electronically capture taxpayer documents and information.

Save time and increase business

With Scan & Store, you no longer have to take the time to photocopy multiple taxpayer documents. Instead, you can capture all taxpayer source documents with a single click.

Reduce costs and move towards a paperless office

With the documentation requirements for both the IRS and banks, the amount of paper used by tax offices over the course of the tax season is significant – as is the cost. With Scan & Store, you are able to drastically reduce the amount of paper used for every tax return. With the money saved, the digital scanner will quickly pay for itself – and more!

Easy to use

Scan & Store is a simple process that your tax office will be up-to-speed on and using in minutes – with minimal training. With Scan & Store, you can:

- Scan and store taxpayer source documents
- Capture valid forms of taxpayer identification
- Take a photo of the taxpayer for quick and easy identification

Motorola™ Symbol DS6707DC

Our software supports the use of the Motorola Symbol DS6707DC handheld digital image scanner. With a viewfinder and an aiming bull's-eye to facilitate accurate point-and-shoot aiming for image capture, the Symbol DS6707DC is easy to use and requires virtually no training.
